Subject: Measured Quality Report

Justin

Thanks for the information on the preparation of the 2004 Measured Quality Report to inform Cabinet.

Please liaise with Brad Smith to ensure correct process is followed for preparation of Cabinet Information and to discuss planned timing of submission to Cabinet. D-G and Minister will then be verbally briefed in Minister/Director-General Meeting as part of this process.

As discussed, Dr Scott will be in attendance to provide additional explanation for Minister. Dr Scott is not available for Min/D-G meeting until April 4.

Regards

Paul

Paul Dall'Alba
Senior Departmental Liaison Officer
Queensland Health

CC: Brad Smith; Jill Pfingst; John Scott

Measured Quality - 2004

The **Measured Quality - 2003** results were provided to Cabinet in a Security Classification 'A' Information Submission on 10 June 2003.

The **Measured Quality - 2004** dissemination strategy, endorsed by Dr John Scott, SEDHS on 22 March 2004, is to proceed on the basis that reports are disseminated to each Health Service District, identify and report their 'Key Indicators', and following this process the reports are to proceed to Cabinet, with Minister and Director General briefed.

1. The Measured Quality team commenced the process of disseminating the 2004 performance indicator results for 76 hospitals through 38 Health Service District (inc: Mater) presentations across Queensland Health on 15th June 2004. The final presentation was undertaken on 2nd September 2004 (12 weeks).

2. Each of the 76 Hospitals have now provided a list of their 'Key Indicators' from Measured Quality – 2004 and will investigate these and provide feedback on:

- Investigation / Evaluation
- Management / Action Plan
- Opportunity to communicate best practice to other facilities
- Contact name

3. This feedback is analysed by the Measured Quality Team,

- and successful improvement activities identified, peer reviewed, and recognised as a current QH improvement / best practice activity.
- Inadequate responses are collated and forwarded to each Zone for advice on further action

4. Each of the Zonal Management Units have endorsed the list of 'Key Indicators' for each of their Districts.

5. In accordance with the 2004 dissemination strategy the reports and key indicators are now due to be provided to Cabinet as a security classification 'A' cabinet information submission, with Minister and Director General briefed.
