Subject: Fwd: night report

Hi Darren,

The Oesophagectomy concerns me somewhat. Have any of these patients survived?

Peter

ICU Bed 1. Currently unoccupied. **Bed 2.** Currently unoccupied. **Bed 3.** Currently unoccupied. **Bed 4.** This bed is currently occupied by the 77 yr old gent post EsophagoGastrectomy from today. This gentleman is currently VENTILATED but not doing well at all. He has received over 30 bags of blood/FFP since going to theatre Monday am and had a return to theatre late in the evening. His condition is poor and he is not expected to survive. All blood products and support inotropes have now been ceased. He is NFR. **Bed 5.** Currently occupied by the 69 yr old gentleman admitted post Repair of AAA. He was extubated during the evening, he is not coping well post extubation. His condition overnight has showed steady deterioration and he may well need reintubation this am. **Bed 6.** Currently unoccupied. **Bed 7.** Currently occupied by a 39 yr old gent admitted post OTH following an MBA. He went to theatre for repair of Lacerated Arm and while in OTH complained of abdominal pain - CT showed a Lacerated Liver and confusion of the Kidney. He has been stable overnight.

Extra Staff -

THEATRE –Staff on Fatigue Leave for the day, Recalled at 0620Hrs for Emergency C/Section – Foetal Distress. CSSD in till 0010Hrs.

EQUIPMENT —Storm caused major havoc with alarms and lifts. Matt in to reset alarms etc and all lifts apart from lift 2 returned to working order, lift mechanic will return to fix this one today. At 0530 the security wardsperson reported that the Faulty detector alarm had been triggered in the Old Nurses Quarters in Zone 1 and Zone 10, this was silenced, no sign of fire etc – appropriate people notified.

PROBLEMS INCURRED/REQUIRING ATTENTION. –

RED CROSS ROOMS – One room Occupied.

Regards,
Barb Taylor.
Night Nurse Manager.
